OBJECTIVE

Dedicated Front-end Developer with hands-on experience in React 19, Vite 7, and AI integration (Google Gemini API). Proven track record of architecting scalable UIs using Atomic Design and optimizing state management with Zustand. Passionate about delivering premium UX/UI and eager to leverage my technical foundation to build high-impact applications while expanding toward a Full-stack role.

SKILLS

Frontend	HTML5, CSS3, JavaScript (ES6+), ReactJS (Context API, Zustand, Redux), Tailwind CSS, Bootstrap
AI & Integration	Google Gemini API (AI-driven features), TMDB API, Axios (Interceptors), RESTful APIs
Backend & Database	Java, C# (basic, OOP fundamentals), MySQL (basic queries)
Tools	Git, Github, Gitlab, Figma (basic wireframing)
Language Skill	English: TOEIC 555 – Able to read technical documents and communicate in basic professional contexts

PROJECTS

FillFilm - Premium Movie Streaming Platform 12/2025 - 2/2026
(https://github.com/MMiiinnn/FillFilm.git) - https://fillfilm.vercel.app/

Role: Product Engineer

Description: A high-performance, Netflix-inspired SPA built with React 19 and Vite 7, featuring AI-driven recommendations and secure user authentication.

Key Achievements:

- **Scalable Architecture:** Leveraged Atomic Design patterns to create a modular UI, ensuring 90%+ component reusability across the application.
- **Advanced State & Logic:** Managed global state using Zustand 5 (with Persistence) and optimized data fetching through Axios Interceptors and Parallel Async Operations.
- **AI & Security:** Integrated Google Gemini AI for smart discovery and Firebase Auth for secure access, implementing Protected Routes and centralized error handling.
- **Modern UI:** Developed a responsive, glassmorphism-themed interface using Tailwind CSS 4, Skeleton Loaders, and Framer Motion.

Tech Stack: React 19, Vite 7, Tailwind 4, Zustand 5, Firebase, Google Gemini API, Axios.

Shoe Store Admin Dashboard 7/2024 - 9/2024
(https://github.com/MMiiinnn/admin_web)

Role: Front-end Developer

Description: A web-based admin dashboard for managing products, users, and orders in an e-commerce system.

My Responsibilities:

• Built a ReactJS-based admin dashboard to manage products, users, and orders for an e-commerce system.
• Implemented CRUD features for product management, handling 20+ mock products with real-time UI updates.
• Collaborated in a 4-member team using Git, following component-based architecture and reusable UI patterns.
• Applied TailwindCSS to create a responsive and consistent admin interface.

Technologies Used: ReactJS, JavaScript (ES6+), CSS3, TailwindCSS, Git.

SiuuStore 1/2025 - 3/2025
(https://gitlab.com/siuuuuu/backend)

Role: Front-end Developer

Description: An e-commerce website for selling shoes, including product browsing, product detail pages, and shopping features.

My Responsibilities:

• Developed and styled product detail pages using JavaScript (ES6+), TailwindCSS.
• Worked closely with backend members to understand database structure and API data flow.
• Used Git for team collaboration and feature integration.

Technologies Used: JavaScript (ES6+), CSS3, TailwindCSS, Git, MySQL (database design).

Mini Food Order App -
(https://github.com/MMiiinnn/Food_order.git) - https://foodorder-contextapi.vercel.app/

Role: Front-end Developer

Description: A front end web application that allow users browse the product, manage a shopping cart, and place orders through a user-friendly interface.

My Responsibilities:

• Developed a mini food ordering web app using React functional components and Hooks.
• Implemented shopping cart and order flow using Context API for state management.
• Integrated REST APIs to fetch product data and handle user interactions.
• Refactored project structure to improve code readability and component reusability.

Technologies Used: JavaScript (ES6+), CSS3, Git.

WORK EXPERIENCE

Post and Telecommunications Technology Center 5/2025 - 7/2025

Intern FE Developer

• Developed and optimized user interfaces using ReactJS, HTML5, and CSS3 for internal systems, improving UI consistency across 5+ screens.
• Assisted in building and updating frontend modules, supporting feature delivery for a team of 4 developers.
• Used Git for version control, contributing to daily commits and resolving merge conflicts during sprint development.

EDUCATION

Post and Telecommunications Institute of Technology (PTIT) 2021 - 2026

Information Security

CERTIFICATIONS

TOEIC 555 2025

React – The Complete Guide (incl. Next.js, Redux) 2025

HONORS & AWARDS

Reached the Semifinal Round of the ICPC (International Collegiate Programming Contest) – University Level 2024
